DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8,10-13 are rejected under 35 U.S.C. 102(b) as being fully met by Manabe (USP 5300725).

Manabe discloses an apparatus for reproducing a presentation provided by transmitted signals, the apparatus comprising a digital radio (Col. 2 lines 35-39), the digital radio programmed to separate (Fig. 1, item 12) signals of a selected instrument 14 from transmitted signals ("audio signals") by selectively filtering the transmitted signals; an automatic selected instrument 14 adapted to be activated by electrical control signals; an interface unit 13 for reformatting the separate signals into the control signals, and speakers 14.

Applicant argues that Manabe does not filter the MIDI data from the received signal. However, the automatic playing apparatus 12 does separate the audio signals from the instrument signals (previously, both signals are combined and being transferred as shown in Fig. 4). This separation of the signals reads on the claimed selective filtering.
